

Regulating Vehicle Access for improved Livability

Introducing ReVeAL

Sidharta Gautama (UGent)

9-10 November 2022, London

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 815069

Regulating Vehicle Access for Improved Liveability

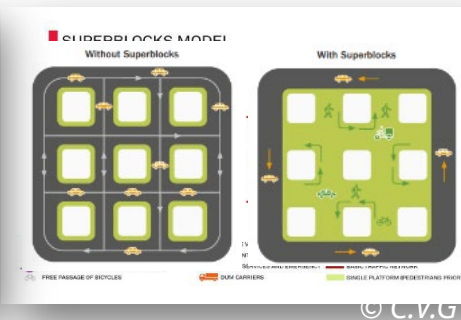

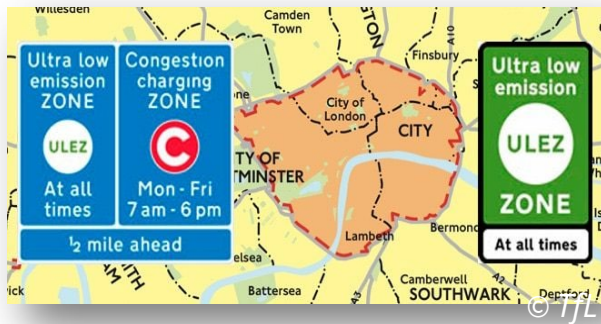

Different UVAR strategies will be developed, implemented and tested in the cities of: Helmond (NL), Jerusalem (IL), London (UK), Padova (IT), Vitoria-Gasteiz (ES) and the project leader Bielefeld (DE)

Add UVAR to the standard repertoire for sustainable mobility transitions

Urban vehicle access regulations (UVAR) – or measures to regulate vehicular access to urban infrastructure are tools that can help cities to become **more liveable, healthier and more attractive for all**.

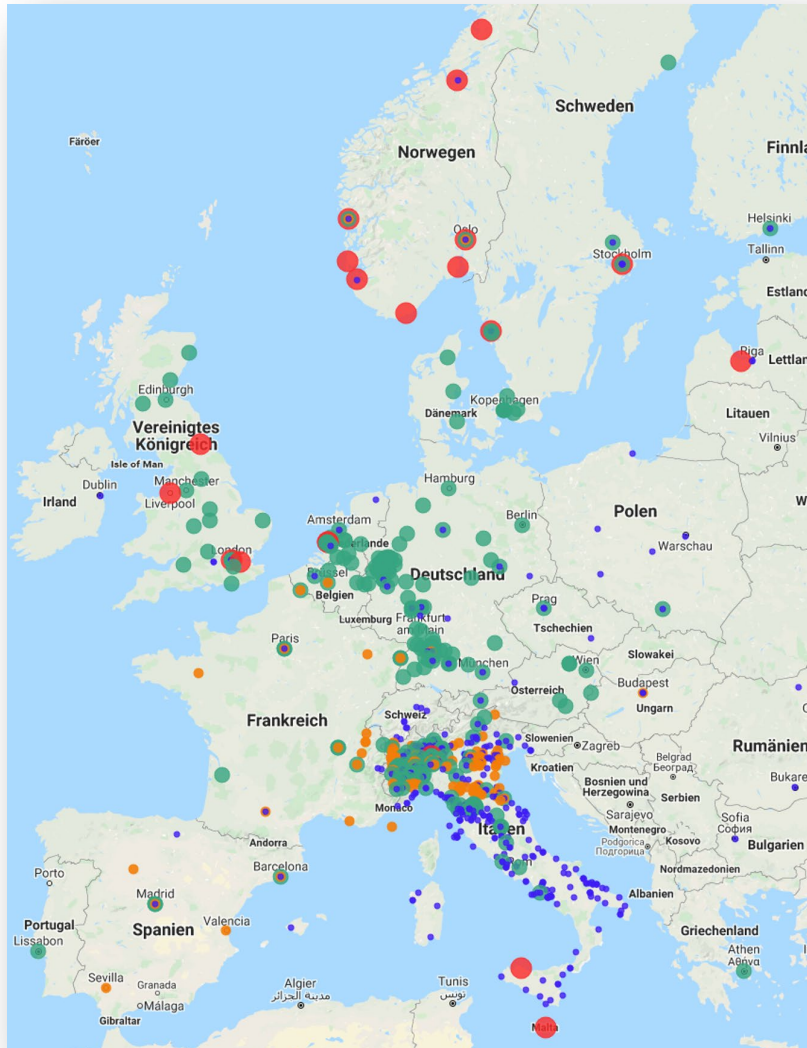

When ‘carrots’ are not enough and ‘sticks’ are needed, these measures help to

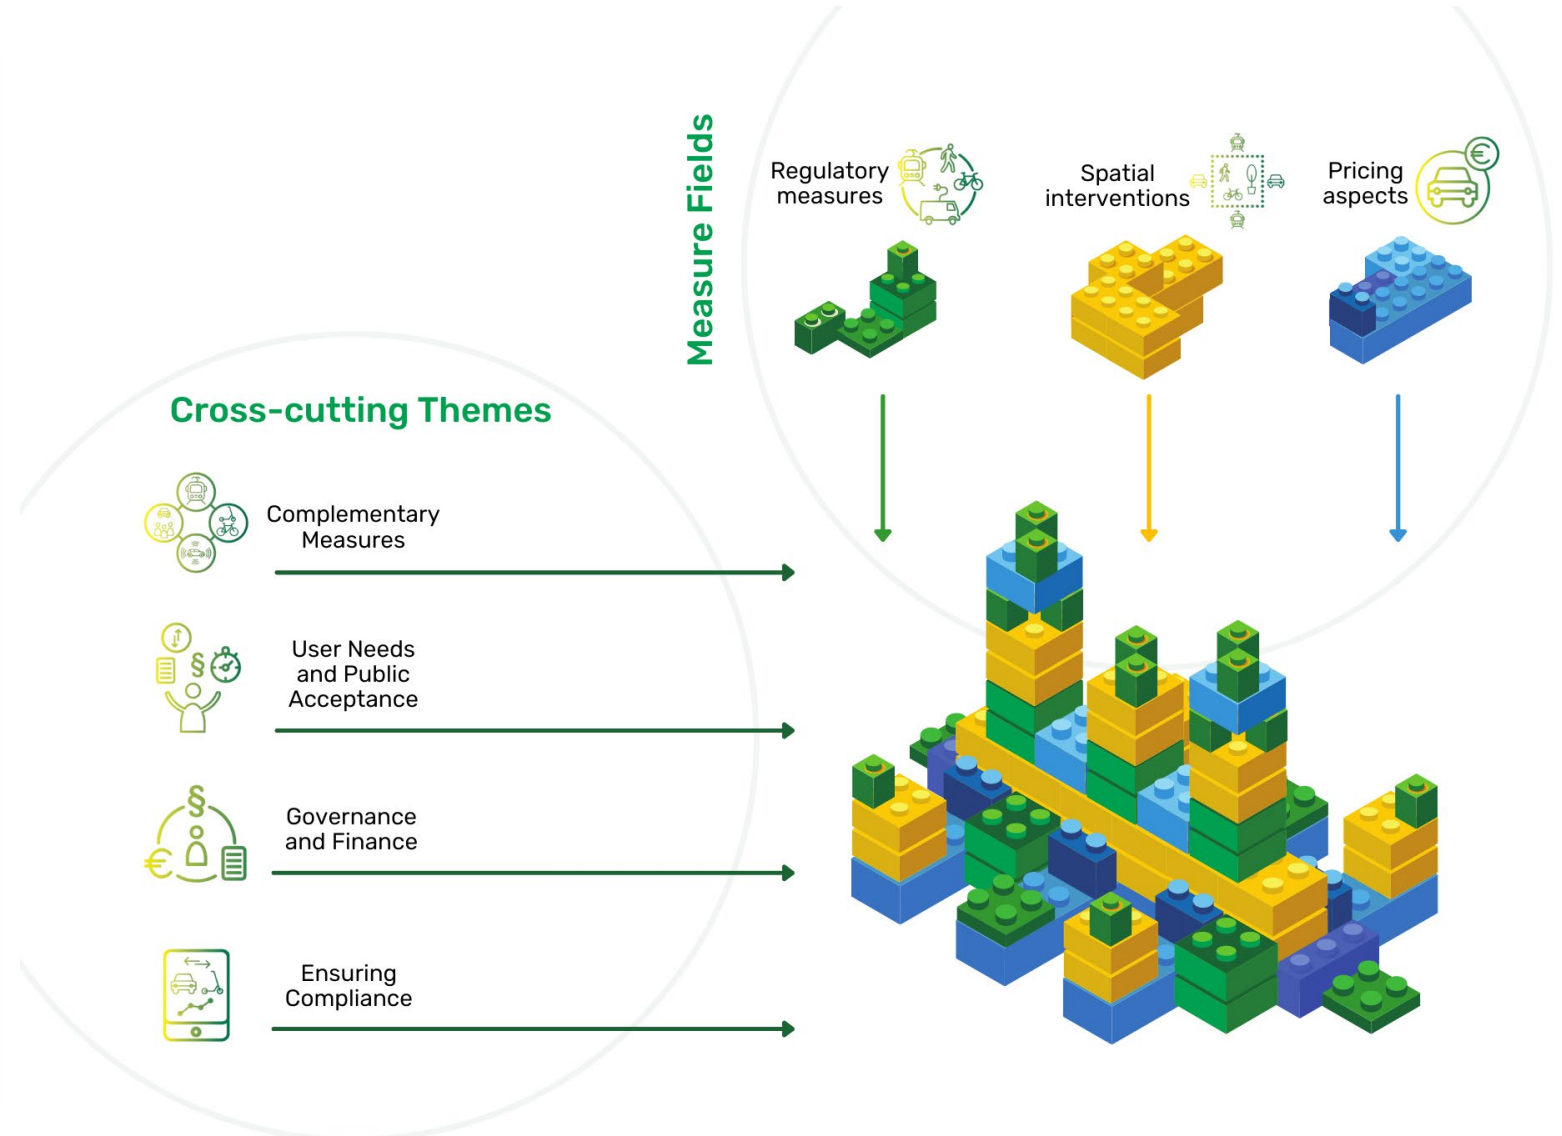

- Reduce urban traffic and congestion
- Reduce emissions and noise hindrance
- Increase level of safety
- Free up urban space
- Improve fairness and equity

There is more to an UVAR strategy than meets the eye

9 UVAR building blocks for the Circulation Plan of City of Ghent

City is divided in 6 sections surrounding the restricted traffic area

Moving from one section to the other by using the inner city ring road

Recirculation

Road blocks as traffic filter

Speed reduction

Implementation of extra cycle lanes

Implementation of mixed-use pedestrian streets

Parklets

Permits for travel

Regulation for delivery and logistics

Through traffic ban

9 UVAR building blocks for the Circulation Plan of City of Ghent

How a Belgian port city inspired Birmingham's car-free ambitions

(May 2017)

Supporting events in the process
of the Circulation Plan of the City of Ghent

Cross-Cutting themes

Complementary Measures

Supporting measure to ease compliance, facilitate adaptation, and minimise equity and undesirable impacts

User Needs and Public Acceptance

Ensuring that the scheme meets user needs and is well accepted by citizens

Governance and Finance

The administrative frameworks and mechanisms

Ensuring Compliance

The tools and methods used to ensure that people can comply with the UVAR scheme

ReVeAL considers UVAR measures as part of a wider transition management challenge which requires **comprehensive and coordinated changes** in our four cross-cutting areas of urban transport systems

*“IT WAS BEAUTIFUL! PEOPLE FROM DIFFERENT
DEPARTMENTS SITTING TOGETHER AND WORKING
TOGETHER ON THE ZTL”*
